

SUREHOLD[®]

Electrically Conductive

WIRE GLUE[™]

BONDS LOW VOLTAGE ELECTRICAL CONNECTIONS

Connects wires together in one simple step ... then conducts electricity

QUICK!
No heating,
No soldering

RELIABLE!
One easy step for
a permanent bond

SAFE!
Lead free,
Non-toxic

Wire Glue is an electrically conductive, water-based adhesive for use as a replacement for soldering in all types of low voltage, low current electrical connections both indoors and outdoors. Wire Glue features durability and weather protection from the elements; is chemical and oil resistant.

For both **AC and DC Circuits**

Great for:

- Repairing wires and connections
- Repairing telephone and TV cords & wires
- Auto and boat wiring
- Solar Cell Leads
- Hobby and science projects
- DIY home repairs
- And more . . .

Note: Due to the high currents, Wire Glue is not recommended for rear window defogger repair.
